Edit Select Query

Nickname for this query:
(no spaces or special chars)

[UpSertRoom]

Domain

[rooms ⬍] *

Item Name:
leave blank to make it a parameter, or use a token to make it secure. Tokens: [%currentuserid%], [%ipaddress%], [%guid%]

[[%shortguid%]]

Delete:
check to make this a delete operation

Batch:
Check to allow batch operations (currently only support the same set of atttibutes for each item in the batch, though you can leave some values blank)

Attributes

List of current attributes, feel free to add new ones. (SimpleDB **is case sensitive**)

description
name
userid

- Remove Attribute

Enter attribute name:
userid

Constant Value: Leave blank to keep it a parameter. Tokens: [%currentuserid%], [%ipaddress%], [%currentusername%], [%guid%], [%smallguid%] , [%currenttime%]
[%currentuserid%]

Replace:
check to replace an existing value, otherwise it will turn into a multi-valued attribute.

- Remove Attribute

Enter attribute name:
name

Constant Value: Leave blank to keep it a parameter. Tokens: [%currentuserid%], [%ipaddress%], [%currentusername%], [%guid%], [%smallguid%] , [%currenttime%]

Replace:
check to replace an existing value, otherwise it will turn into a multi-valued attribute.

- Remove Attribute

Enter attribute name:
description

Constant Value: Leave blank to keep it a parameter. Tokens: [%currentuserid%], [%ipaddress%], [%currentusername%], [%guid%], [%smallguid%] , [%currenttime%]

Replace:
check to replace an existing value, otherwise it will turn into a multi-valued attribute.
